Division(s) – Modified, Pro Late Model

Engines

To make racing more affordable, EMRP will be allowing unsealed 602 crate engines in 2025 for the Sportsman Modifieds and Pro Late Models. They will serve as an alternative to purchasing a sealed crate engine costing \$7,000 - \$10,000. This will also make it possible for teams to make repairs to their engines without taking it to a certified engine rebuilder.

All engines must remain as delivered by GM and must conform to GM factory sealed 602 crate engine specifications. These specifications will be closely monitored, and engines will be subject to technical inspection as necessary.
